

## And finally...

Please be assured that we will do all we can to minimise construction impacts for everyone and your patience and cooperation is appreciated while these works are underway.

If you need more help and would like to contact us about our works it's best to get in touch by email if you can:

[handee@cormacltd.co.uk](mailto:handee@cormacltd.co.uk)

You can also call us on:

**0300 1234 222**

The project team will provide regular updates to Cornwall Councillors for Looe advising on the works programme and progress being made with the scheme.

# Sandplace Road Looe

A bitesize guide

## What is happening?

CORMAC Solutions Ltd will be undertaking stabilisation works on behalf of Cornwall Council.

Works will take place to the embankment below St Martins Road in Looe which is located between two sections of previously completed works.

Sandplace Road is a section of the A387 at the base of the valley of East Looe, above the East Looe estuary and railway line. The road extends from the junction with St. Martin's Road north alongside the A387.

A 65 metre section to the north of the junction with St Martins Road will be stabilised in order to prevent any further movement occurring.

This will be done by installing a conventional 'soil nailing, meshing and bolting' support system.

Area of slope stabilisation works

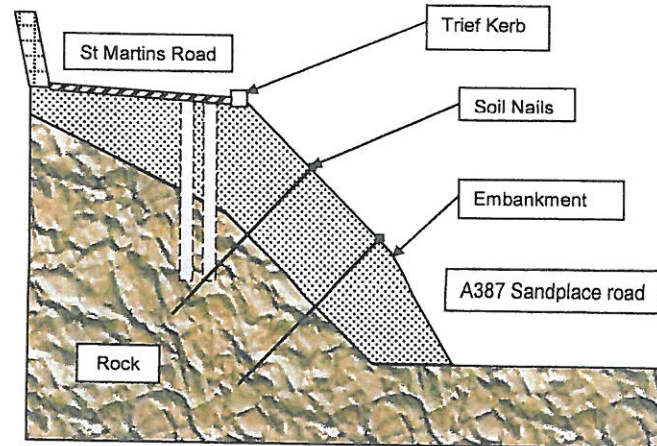

## When will the works start?

The works will commence on 9 January 2017.

The scheme is anticipated to be completed before the start of the Easter holidays.

Our teams will be working some weekends to ensure we meet the programme on time. This will also help us to maximise the daylight hours and avoid use of artificial lights and minimise the impact our works may have.

## Typical proposed section

## Road closure

In order to carry out the works, the road along Sandplace Road will be closed to traffic and diversion routes will be in place.

Access for pedestrians will be maintained throughout the construction period. Once the works are completed, Sandplace Road will be fully re-opened.

For your own safety we trust you will work with us on the project, and take particular note of the diversionary routes and any revised road and footway layouts and follow the signs as directed.
